8 NOV 1988

MEMORANDUM FOR: COMIREX Members

SUBJECT: Elimination of the Object Data File

1. As a result of a user community survey concerning the maintenance and use of the Object Data File (ODF), the ODF Review Panel has recommended to the COMIREX that the file be eliminated as one of the NTP-directed national files. It is the view of the panel that the file no longer serves the purpose for which it was created and its present level of use does not warrant its continued maintenance. Unless objections are raised to this proposal, I intend to direct that the following actions be taken relative to the ODF.

a. Discontinue immediately all maintenance activity relative to the ODF. This will relieve NPIC/ESG of further responsibility for updating the file.

b. Remove the Object Data File from the list of nationally-directed files in the NTP when the NTP is next updated.
